PROFESSIONAL SUMMARY

Business & Data Analyst with 9 years of professional experience, including 4+ years on Riyadh Municipality projects, turning operational data into decision-ready dashboards and KPIs. Designed and delivered BI platforms governing multi-million-riyal maintenance contracts, and automated executive reporting end to end – from data cleaning to daily delivery with no manual step. Skilled in Power BI, DAX, Power Query, SQL and Excel across data modelling, dashboard design and workflow automation. PMI CAPM® certified; delivered over 360 hours of hands-on Power BI workshops to 150+ staff, and authored their material.

SKILLS

Power BI · DAX · Power Query · SQL · Microsoft Excel (Advanced) · Data Modelling · ETL & Data Cleaning · Dashboard Design · KPI Development · Business Analysis · Executive Reporting · Workflow Automation (n8n) · Requirements Gathering · Data Visualization

EXPERIENCE

Business Analyst – Al-Shathri Company – Riyadh Municipality projects (Operations & Maintenance Agency)

Dec 2021 - Present

- Built a 34-screen operations platform running multi-million-riyal street-lighting maintenance contracts for the Wasat sector – from data cleaning to the decision board, as sole analyst, designer, developer and operator.
- Automated the seven-page daily executive report so it reaches the director by email and Telegram with no human in the loop, replacing manual preparation every morning.
- Replaced subjective contractor assessment with one objective yardstick across eight maintenance contracts: spend rate against elapsed duration, safety score, and deducted penalties.
- Ran a risk analysis of the lighting network – tens of thousands of poles and hundreds of stations classified into five risk tiers from resistance and leakage readings – so repair priority rests on measurement rather than judgement.

Business Analyst & Designer – Mihab Advertising & Marketing

2017 - 2021

KEY PROJECTS

Wasat Sector Platform – Street-Lighting Maintenance — Riyadh Municipality · General Directorate of Infrastructure

A 34-screen operations platform running multi-million-riyal maintenance contracts: automated data cleaning, a field map of citizen complaints across multiple zones, an objective contractor scorecard, EVM forecasting, and an analytical assistant plus a daily executive report delivered to the director automatically.
